INTRODUCTION

Your Co-operation

Coffee / lunch / W/C Facilities

Fire Alarm

Workshop Material (leave on tables)

Take Minimum Notes CD (post-event/s feedback report/s)

Mobiles, please!

Aims of today

- To communicate the forthcoming legislation, promote SWMPs and associated benefits
- To gain an understanding of Site Waste Management Plans (SWMPs)
- To equip delegates with skills needed to produce a SWMP
- To work through the development of a SWMP via three group workshop exercises
 - Workshop 1 – Preparing your SWMP
 - Workshop 2 – Implementing your SWMP
 - Workshop 3 – Review your SWMP

By the end of the day you should be able to:

- Appreciate the importance of SWMPs
- Understand the opportunities and benefits of SWMPs
- Produce a SWMP
- Know where to get guidance, practical advice and information

Envirowise and WRAP Joint Working

- Pleased to announce that Envirowise and WRAP will be working closely together from April 2008 in the construction sector
- That cooperation has already started
- Currently producing a joint business plan for 2008 onwards

Envirowise Objectives

To engage with construction sector stakeholders to stimulate actions and deliver improvements in resource efficiency and waste minimisation

To provide sound practical advice on resource efficiency and waste minimisation from resource demand and supply to utilisation

To underpin our advice with proven guidance, case studies, models, tools and training

Envirowise Key Activities

Advisory Visits

Small Builder and Trade Support

Site Waste Management Plans

Trade Supplier Support

Design Support (incl packaging)

Supply Chain Partnerships

Guidance and Case Studies

Marketing

Projects

Advisory Services

WRAP Objectives

WRAP's construction team is working with construction clients and contracting supply chains to:

- set standards for good practice in waste and resource management for the industry sector
- promote the business case for change
- provide free access to tools and know-how so that construction projects can make best use of materials resource and, in doing so, create real commercial value for the industry.

WRAP Key Activities

- **publications** on standards and benchmarks of good practice
- **exemplar wording** for pre-qualification questionnaires, briefs and contracts
- **on-line recycled content toolkit** for calculating performance and opportunities
- **reference guide** identifying specific products with higher levels of recycled content
- **case studies** covering all types of construction
- **training packages** and in-house delivery for RC and SWM procurement, toolkit use and SWMP implementation
